NARRATIVE SUPPLEMENT			Page 3 of 3 Pages
PONCA CITY POLICE DEPARTMENT	ORI#: OK0360300	CASE NUMBER:	20005975

Josh Fields: I own the apartment complex at 410 W Cleveland in Ponca City, OK 74601. On 03/24/2020 someone knocked on my door and told me that they'd seen that my building was on fire on Facebook Live. The apartment complex did not have anyone living there. The gas and water was turned off to the building. One of the apartments and the hallways had electricity. I boarded up the doors and windows when the last tenant moved out to keep the building secure and warm through the winter.

Ptl. Kisen Sharp: On 03/24/2020 at approx. 2305hrs I responded to the area of Grand Ave. & Elm St. in Ponca City, Kay County, OK 74601 in reference to a possible structure fire in the area. While en route I observed the apartment complex at 410 W Cleveland Ave. engulfed in flames. The complex had been previously boarded up since there were no tenants living in the building.

The plywood front door had burned through so I could see down the hallway and did not observe anyone inside. I checked the exterior of the building and did not locate anyone on the property.

Ponca City Fire Department responded and started working on extinguishing the fire.

I checked with multiple neighbors in the area who advised they had not seen anyone in the area recently. They also stated the last time they looked at the complex they plywood was still covering the doorway.

I remained on scene until I was relieved at approx. 0615hrs.

I had my department issued body worn camera activated during the call for service.

NARRATIVE SUPPLEMENT			Page	of	Pages
PONCA CITY POLICE DEPARTMENT	ORI#: OK0360300	CASE NUMBER:	20005975		

Detective Sgt. Brian Dye: On 03-25-20 I was assigned to investigate a fire reported at 410 W. Cleveland Ave. The fire was originally reported at approximately 2300 hrs on 03-24-20. The building is an apartment building that was vacant at the time of the fire. The fire department extinguished the fire during the night and continued to hit hot spots throughout the night. I did not begin my investigation until after sunrise on 03-25-20.

I began by taking photographs around the exterior of the building and also took photographs above the building while up in the air in the PCFD's aerial truck. All the doors and windows had boards covering them, however some had been burned through.

I entered the building through the front (North side) door. I took photographs throughout the both levels of the apartment building. There are 8 apartments within the building. 4 on the lower level and 4 on the upper level. There is a hallway running north and south between the apartments in the middle of the building. In the middle of the hallway is the stairs leading to the upper level. There are also 2 storage buildings on the back (south side) of the apartments. Some of the doors on the storage buildings were open when I began my investigation. There was also a large dumpster on the south side between the storage buildings. It appeared there was or had been some remodeling going on in the apartments.

Due to the large size of the building and complexity of this investigation, I called and requested mutual aid assistance from the McCord Fire Department Fire Investigator David Van Buskirk. Based upon the fire patterns observed, I believe the fire originated on the lower level and traveled up to the upper level. I based my origin and cause on the lower level. A search of the lower level, indicated the fire originated in the hallway and not in an apartment. We concentrated our investigation to the lower level hallway. Based on our investigation, it was determined the origin of the fire was under the stairwell. There was a space on the underneath the stairwell that some of the framing and walls were completely consumed by the fire. In the floor was a large square cut out in the flooring. The only items in this area under the stairs was a half circle metal cover and part of an extension cord. Looking into the hole I could see water from fire suppression. There was substance floating on top of the water which appeared to be a petroleum product. Using a clean glass vial, a sample of the substance was collected. I also used my latex glove and tried to get some of the substance on the glove. The vial and glove were placed into separate containers. The fire debris was cleared from the lower level hallway to look for other evidence or possible origins. Photographs were taken of the hallway after the debris was cleared. There was an extension cord located that ran from a wall outlet in the lower NE apartment. The cord ran down the hall and into the space under the stairs. A search of the cord found several areas of arcing on the wires. The arcing was marked with evidence tape and photographed. The extension cord was not plugged into anything under the stairwell and was left in place and not collected. A vac truck was called in to remove the water under the stairwell to search for additional evidence. Once the water was removed, no other evidence was found and only some trash was found.

While continuing to search for other evidence, a portable kerosene heater was found the east storage building just inside the walk-in door. The top cover was missing. The top cover was determined to be the top circular piece found under the stairwell. I sample of the liquid from the fuel tank on the heater was collected for comparison to the liquid found in the hole under the stairwell.

On 03-25-20 at approximately 1400 hrs., I conducted an interview with Blake Langfelt and Justin Burns. They reside at 118 ½ N. Oak apartment # 2. Blake stated he was at home last night. He stated he did not notice anyone around the apartment building. He stated he did not notice any fire prior to any fire trucks arriving. He stated he believes the apartments were boarded up approximately a month ago and has seen no one around since then. This interview was recorded.

Based upon my investigation, I believe the origin of the fire was near or under the stairwell on the lower level of the building. It is unknown what item was first ignited or how the fire originated. Based upon my investigation the fire cause is undetermined.

The evidence collected was placed into the Ponca City Evidence Vault and later sent to the OSBI Lab for further analysis. On 06-16-20 I received a report back from the OSBI Lab. The samples sent, which include the sample of liquid taken from the hole, the sample on the latex glove, and the sample collected from the heater all returned to contain a heavy petroleum distillate. This includes kerosene, diesel fuel, some jet fuels, and charcoal lighter fluid.

There has been no other evidence found or information received as to how this fire started. The fire remains to be undetermined.

CRIMINALISTICS EXAMINATION REPORT

LAB NO.: 2020-005078	Reported To: Brian Dye
Report# 1	Address: Ponca City Police Department 200 East Oklahoma Ponca City, OK 74601
Date Received: May 05, 2020	
Date Reported: June 16, 2020	Submitted By: Tucker Hodgson, Ponca City Police Department
Classification of Case: ARSON	Distributed By: Online
Subject(s):	Victim(s): Joshua FIELDS, W/M, 02/11/1981

Reference: Ponca City Police Department Case#: 20005975

Description of Evidence:

Item 1 One evidence envelope containing items 1A and 1B
Item 1A One plastic bottle "#1" containing one glass bottle containing a liquid
Item 1B One plastic bottle "#3" containing one glass bottle containing a liquid
Item 2 One metal can "#2" containing fabric and liquid

Results and Conclusions:

Items 1A, 1B, and 2 were analyzed utilizing Gas Chromatography/Mass Spectrometry (GC/MS). These items contain an ignitable liquid in the heavy petroleum distillate class. Examples of products in the heavy petroleum distillate class include kerosene, diesel fuel, some jet fuels and some charcoal starters. The results apply only to the sample(s) received. The evidence, including the sample used in analysis, will be returned to the submitting agency.

Pursuant to Title 22 O.S., Section 751, I hereby certify that I am the maker of this document, and that it is a true and correct report of the finding of the Oklahoma State Bureau of Investigation Criminalistics Laboratory.

CRIMINALISTIC SERVICES DIVISION LABORATORY EVIDENCE RELEASE FORM

These items have been tested and handled in the normal course of business by the Criminalistic Services Division of OSBI. No warranty is made as to identity, purity, or pharmaceutical suitability for human consumption.

Chain of custody should be maintained for future legal proceedings and evidence should be maintained in a condition that would allow further forensic examination. All biological evidence must be returned and preserved for such period of time as any individual convicted of that crime remains incarcerated (title 22§1372).
